

Contract Performance Specifications Writer

Northstar Project Management, Inc is interested in contracting with an independent performance specification writer or company for vertical construction work. Projects on the books currently include K12 Education Facilities and Military Construction at locations across the country. Must have BSD SoftLinks' Perspective, be willing to take some descriptive specifications such as an Installation Design Guide (Military) and convert it into performance statements and know how to manually extract substantiation from the performance specs into a spreadsheet. Professional liability insurance desired/required.

Please send a list of projects, resume and rates to Leandra@northstarpn.net. I would be happy to take phone call but I travel a lot and email is easier.
